

Mango QHSE Compliance Software

Mango QHSE Compliance Software makes it easier for companies to manage their compliance requirements. It is **easy to implement, simple to use** and there are **no hidden costs**: just a simple monthly licence fee which more than pays for itself. We like it a lot, but don't just take our word for it.

Read why FQM clients and their external certification auditors like Mango:

Make QHSE everyone's priority

"It gets ALL staff involved, sharing the responsibility of getting things right and taking responsibility if they go wrong."

"It frees up my time as I'm not the only one reporting and collating info!"

Gillian O'Neill, Office Manager, Cameron Presentations, Edinburgh

Wave goodbye to spreadsheets

"It is one system - rather than numerous spreadsheets - assisting in giving ownership for processes out-with the QHSE department."

Shona Hendry, Group QHSE Manager, Hydrus Energy, Brechin

Monitor and improve

"All of our operational facilities to feed seamlessly into it, providing a wealth of information at our fingertips"

PJ McFeeley, Operations Director, Ferrier Pumps Ltd, Glasgow

Take audits in your stride

"From an assessment point of view, clients using Mango tend to be well prepared for the audit as the system provides a logical framework for them to follow."

Derrick Ross, Lead Assessor and Scheme Manager (QMS), The British Assessment Bureau

Create accountability

"Nothing is left to chance as the system self-manages and once something is in the system it is safe, measurable and creates accountability."

Roy James, Projects Director, Amos Beech, Falkirk

Increase efficiency

"It allows us to automate a lot of the more administrative tasks previously required for operating our compliance system."

PJ McFeeley, Operations Director, Ferrier Pumps Ltd, Glasgow

"It saves the client time, gives them confidence and is more efficient."

Derrick Ross, Lead Assessor and Scheme Manager (QMS), The British Assessment Bureau
